Ketha Venkata Sai Krishna

8885906728 | kethavenkat04@gmail.com | LinkedIn | GitHub | Hyderabad, Telangana

Summary

Full Stack Developer at Stackly with 6 months of professional experience developing web applications using ReactJS, Python, and MySQL. Computer Science and Engineering graduate with knowledge of frontend and backend development, API integration, database operations, debugging, and software development practices.

Professional Experience

Stackly Apr 2026 – Present
Full Stack Developer *Hyderabad, Telangana*

- Develop and maintain full-stack application features using ReactJS on the frontend and server-side technologies on the backend.
- Work with REST APIs and MySQL database operations to support application functionality and CRUD operations.
- Build responsive UI components, use Git and GitHub for version control, and collaborate with the development team.
- Assist with debugging, API testing, and resolving application issues.

Education

Institute of Aeronautical Engineering 2021 – 2025
B.Tech, Computer Science and Engineering *CGPA: 7.81*

Narayana Jr College 2019 – 2021
MPC *Percentage: 89.4%*

Bhashyam High School 2018 – 2019
SSC *GPA: 8.3*

Technical Skills

- **Programming Languages:** Java, Python, JavaScript
- **Web Development:** HTML, CSS, Bootstrap, ReactJS
- **Backend:** Java Servlets, JDBC
- **Databases:** MySQL, Oracle 10g XE
- **Tools and Platforms:** Git, GitHub, Vercel, VS Code, MySQL Workbench, Eclipse, Apache Tomcat, JSON Server, Postman

Projects

BikeHub Application Click

- Developed a responsive React bike showroom application using components, props, Hooks, Context, useReducer, React Router, nested routing, and URL parameters.
- Implemented mock API CRUD operations, custom hooks, form validation, and dynamic rendering.

Travel & Booking Dashboard Click

- Developed a responsive travel management dashboard using ReactJS to manage destinations, trips, customers, bookings, and payments.
- Implemented CRUD operations, search, filtering, sorting, pagination, booking status management, and analytics with charts for a streamlined booking workflow.

Online Book Store Click

- Developed an online bookstore with authentication, search, filtering, cart management, and order functionality using JavaScript, Axios, and JSON Server.

Certifications

- Python & Django – Udemy — Jan 2026
- Java Full Stack Course – Codegnan — Feb 2025
- Zscaler Cybersecurity Fundamentals Associate – Zscaler — Apr 2024
- Python – GUVI; Python Basics – HackerRank — Jun 2023
